SOFTWARE DEVELOPER

Software Developer with 4 years, 5 months of experience building and maintaining web applications using PHP/Laravel, JavaScript, MySQL, and REST APIs. Strong backend focus with experience in reporting modules, internal tools, ticketing systems, and API-driven dashboards. Comfortable working on production systems, debugging issues, and improving performance and security.

SKILLS & TECHNOLOGIES

Backend: PHP, Laravel, Python (FastAPI)

Frontend: JavaScript, HTML5, CSS3, AJAX

Database: MySQL

APIs: REST APIs, SQLAlchemy, PyMySQL

Cloud: AWS S3

Security: Parameterized Queries, Encryption/Decryption, Input Validation

Tools: Git, GitLab

PROFESSIONAL EXPERIENCE

SOFTWARE DEVELOPER (BACKEND / FULL STACK)

Zsapiens (formerly Aaddoo) Pvt. Ltd

Software Developer | 2021 – Present.

- Developed and maintained backend modules for a university learning management platform using PHP and MySQL.
- Built reporting and analytics modules with dynamic filters and interactive charts (Chart.js, Highcharts) for admin and academic teams.
- Designed and implemented REST APIs to support dashboards and internal integrations.
- Worked on production bug fixes, performance optimizations, and feature enhancements.
- Implemented secure database access using parameterized queries and encryption techniques.
- Collaborated with cross-functional teams to deliver features and ensure system stability.
- Worked on systems used by thousands of students and admins.

● E-Ticketing & Query Resolution System

Role: Application Developer

Description:

- Built an integrated ticketing system within the learning platform to handle student support queries.
- Implemented real-time query tracking and a centralized admin dashboard.
- Streamlined communication workflows and eliminated dependency on external support tools.
- Improved visibility and turnaround time for student query resolution.

Tech Stack: PHP, MySQL, AJAX, JavaScript

- **AI-Powered Query Analyzer**

Role: Backend API Developer

Description:

- Developed a FastAPI-based backend service to analyze student support queries using LLM (Ollama – Gemma model).
- Implemented APIs to fetch and process data from MySQL using SQLAlchemy.
- Generated category-wise summaries and insights with interactive Pie and Bar charts.
- Designed clean JSON-based APIs with proper error handling and loading states.

Tech Stack: FastAPI, Python, SQLAlchemy, MySQL, Highcharts, JavaScript

- **Shoolini Online Platform – shoolini.online**

Role: Web Developer

Description:

- Developed a responsive web portal to showcase online degree programs (BBA, MBA, BAJMC).
- Implemented frontend components using HTML, CSS, and JavaScript.
- Built backend logic with PHP and MySQL for dynamic content management.
- Improved user experience using AJAX-based asynchronous loading.

EDUCATION

Master of Technology (Computer Science & Engineering) —
Ongoing

Shoolini University | Expected 2026

Bachelor of Technology (Computer Science & Engineering)

Shoolini University | 2017 – 2021
